Modifications to Clinical Markers

If observations are expected for patient's clinical condition, please note below accepted parameters for future calls

Respiratory Rate		
O <sub>2</sub> Saturation		
Blood Pressure		
Pulse		
Temperature		
Urine for 2 hours		
Date		
Name /Signature		

24 Hour Fluid Balance Summary

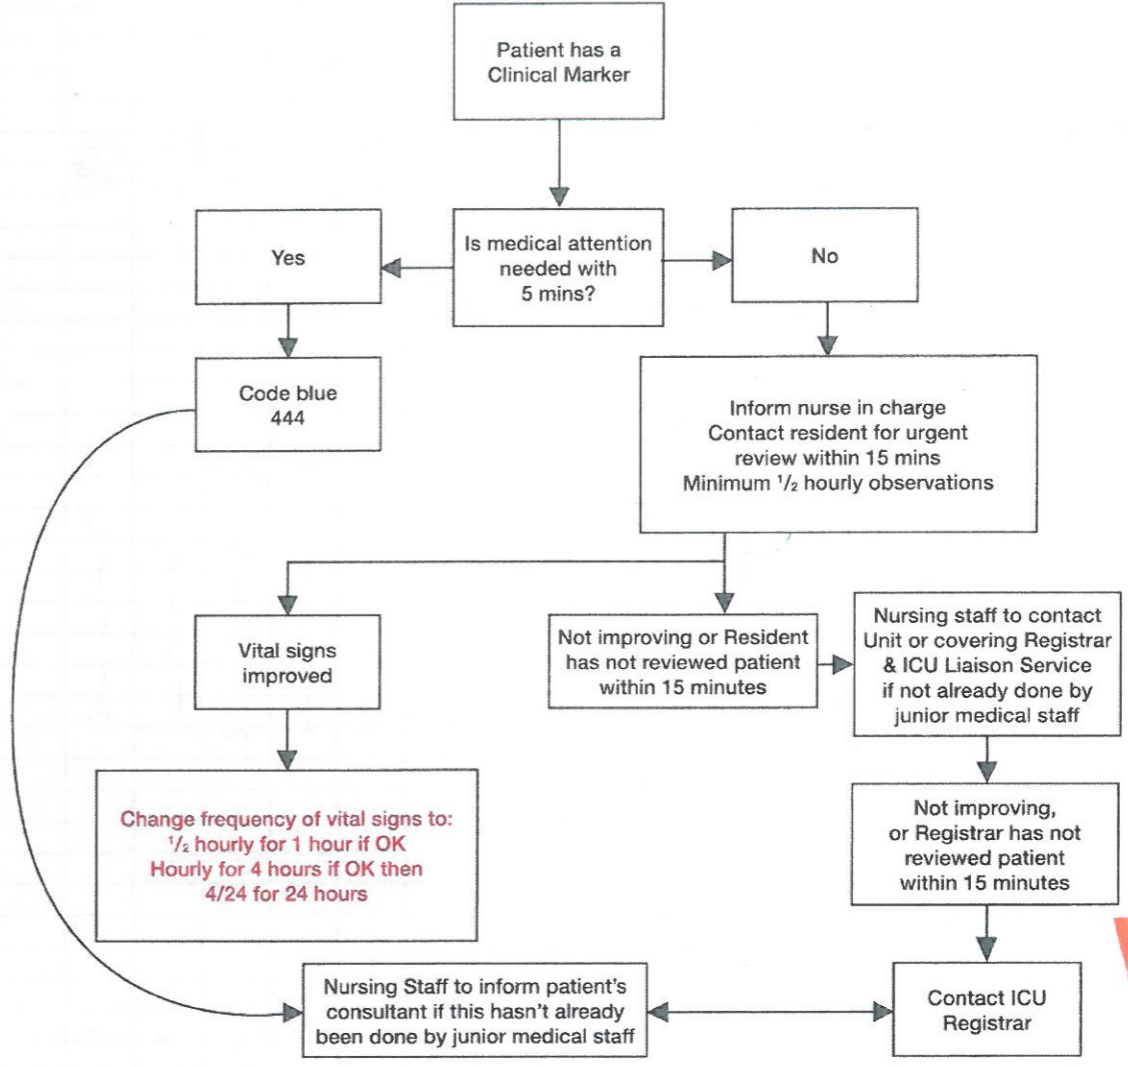

Date *Yesterday*

Urinalysis *Trace ketonocytes*

Date	Oral	Enteral	IV	Total Input	Urine	N/G Vomitus	DT	Total Output	Balance
<i>Yesterday</i>	<i>50</i>		<i>375</i>	<i>605</i>	<i>605</i>			<i>incomplete</i>	

OBSERVATION FORM

ESCALATION ALGORITHM FOR CLINICAL MARKERS  
 Algorithm operates 24/7

ESCALATE RESPONSE

Date		Yesterday				Today								
Time		2230	2300	2330	2410	0030	0100	0130	0200	0230	0430	0600	0800	1200
<b>Respiratory Rate</b> (If breaths/min $\geq 30$ write value in box)	Write $\geq 30$	[Handwritten respiratory rate data]												
	25-29													
	20-24													
	15-19													
	10-14													
<b>O<sub>2</sub> Delivery</b> Write L/min	Write $\geq 30$	[Handwritten O <sub>2</sub> delivery data]												
	$\geq 94$													
	90 - 93													
	88 - 89													
	85 - 87													
<b>Blood Pressure</b> (mmHg)	Write $\leq 84$	[Handwritten BP data]												
	Write $\geq 200$													
	190													
	180													
	170													
	160													
	150													
	140													
	130													
	120													
	110													
	100													
	90													
	80													
	70													
60														
50														
<b>Pulse</b> (beats / min)	Write $\leq 40$	[Handwritten pulse data]												
	Write $\geq 140$													
	130													
	120													
	110													
	100													
	90													
	80													
	70													
	60													
<b>Temperature</b> (C)	Write $\leq 40$	[Handwritten temperature data]												
	$\geq 38.6$													
	38.1-38.5													
	37.6 - 38													
	37 - 37.5													
<b>Consciousness</b> If necessary wake patient before scoring	Alert	[Handwritten consciousness data]												
	To voice													
	To pain													
	Unresp													
<b>Blood Observations</b>														
<b>Weight</b>														
<b>Bowels</b>														
<b>Pain Management Observations</b>														
Sedation Score		[Handwritten sedation scores]												
Pain Score	Rest	[Handwritten pain scores - Rest]												
	Movement	[Handwritten pain scores - Movement]												
Functional Activity Score		[Handwritten functional activity scores]												
Nausea/Vomiting Score		[Handwritten nausea/vomiting scores]												
Patient Controlled Analgesia		[Handwritten PCA data]												
<b>Epidural or Regional</b>	MB													
	SB - Right													
	SB - Left													
	CL
